Continental Terminals Plans Further Expansions

SUFFOLK, Virginia (August 14, 2013) Continental Terminals will be once again expanding their operations in Suffolk. The coffee bean blender and distributor is finalizing terms with the Suffolk Economic Development Authority to purchase 3.7 acres adjacent to their current site at 1394 Progress Road, in Wilroy Industrial Park.

The additional land will allow Continental Terminals to add onto their existing 70,000 square-foot building. In 2012, they invested \$2.7 million to purchase and outfit the existing building. The building is used to receive, store, distribute and blend custom combinations of coffee. They also operate another 60,000 square-foot facility nearby.

Continental Terminals has been in a state of steady growth since their inception in 1958. They have been operating in Suffolk for six years and work closely with other beverage operations in the area, such as J. M. Smucker, Massimo Zanetti and Green Mountain Coffee.

The Suffolk Economic Development Authority will provide support for Continental Terminals' building expansion by issuing an Economic Development Investment Program grant of \$100,000, in phases, upon project completion.
