MUNICIPAL CENTER CONSTRUCTION WORK TO START

SUFFOLK, Virginia (February 22, 2013) Following yesterday's official Groundbreaking Ceremony, citizens will soon begin to see a flurry of activity as pre-construction site work for the new facility begins in earnest.

The first phase will be the installation of construction fencing around the perimeter of the site set to begin on Monday, February 25, 2013. Additionally, a number of existing poles for Verizon and Dominion Virginia Power will be removed.

Heavy equipment and a stockpile of materials will then be brought on-site.

Parking on the south side of the current Municipal Building, located at the rear of the building, will be eliminated, with parking made available at the north parking lot directly in front of the Municipal Building, as well as designated on-street parking.

Updates will be provided on a regular basis to keep citizens informed as this exciting project is underway and to advise them of upcoming detours and other related issues.
