

## “LCD Monitor”

---

We recently found a long-term replacement monitor. Sony discontinued the LCD monitors and we were using the Tivax monitor as an interim replacement. The new monitor we will supply with Traficon systems is from EMS Technologies. A data sheet from the manufacturer is attached along with a new Control Technologies data sheet. We expect to begin shipping these monitors on 12/12/2012.

Included in our evaluation of suitable monitors was visibility in sunlight conditions. We were very satisfied with the results from this monitor.

The Part Number for the monitor will remain P/N “DVP-MONITOR”
