Davies Commercial Masonry Relocates and Renovates in Downtown Suffolk

Davies Commercial Masonry, a local brick and masonry company, recently relocated to 424 East Pinner Street near historic downtown Suffolk. Edward and Tom Davies, owners of Davies Masonry, are excited about their new location which transformed a former skating rink into their new corporate headquarters. The company had formerly been operating out of a small office and was renting warehouse space at a separate location. With the help of a local architectural firm, McEntire Design Architects, the newly redesigned building has character and appeal.

"Tommy and I are very pleased that we found an old and outdated building in Suffolk that we were able to fix and transform into a thriving and viable place of business. It turned out to be something that he and I can be proud of," commented Edward Davies.

"Every building in a community has a story to tell of its past, and the renovation of this building keeps the story alive," said Mayor Linda T. Johnson. "We thank each employee from Davies Masonry for their hard work and dedication and wish them the best of luck in their new facility."

Davies Commercial Masonry provides masonry subcontracting work for the commercial industry. For more information on the company or for a quote contact them at 757.934.8061.
