Last Week for Special City-Wide Storm Debris Pickup

SUFFOLK, VA (September 27, 2011) - The Department of Public Works reports that over 30,000 cubic yards of storm debris have been removed from neighborhoods throughout Suffolk in the month following Hurricane Irene. Debris has been collected in each neighborhood in the City at least once, and the City will resume normal bulk refuse collection, as well as limitations on the number and size of bulk pick-ups per year (12 times/year maximum, eight cubic yards), on October 1, 2011, as was previously announced. Residents with questions about bulk trash removal or curbside garbage collection are encouraged to call the Suffolk Department of Public Works at 514-7630.
