Information Technologies Chooses Suffolk for New Support Operation

I Information Technologies, Inc. (DBA *ISHPI*) has leased 31,000 square feet of office and research and development space within Bridgeway Commerce Center, supporting Department of Homeland Security (DHS), United States Coast Guard (USCG), and United States Navy operations. The new operations in Suffolk will primarily support DHS and the Department of Defense (DoD), providing Information and Cyber Dominance (ID), Engineering, Integration, and Information Technology services. This project will create over 200 jobs within the next two years. The new Suffolk operation will be fully functional by late October.

ISHPI is a premier provider of Information and Cyber Dominance with core capabilities in Information Operations, Warfare, Assurance, Electronic Warfare, Cybersecurity, and Cyberwarfare. *ISHPI* is conducting operations on the East coast from Massachusetts to Florida and as far west as San Antonio, Texas, supporting the Intelligence Community, Department of Homeland Security, and the Department of Defense, ensuring Information Superiority. *ISHPI* is a capabilities-driven SBA award winning American-Indian and Service Disabled Veteran-Owned 8(a) Small Disadvantaged Business.

“*ISHPI*’s expansion to Hampton Roads will allow us to better serve our growing client base in the area and along the East coast and it is right in line with our strategic goals,” Noah T. Leask, *ISHPI*’s President and CEO, said. “Being close to our clients and their

mission allows us to continue to provide solutions at an even greater speed, ensuring success. Our facility is multifunctional where we can support many missions to include C5ISR Integration and Cyber Supply Chain Management.”

Suffolk Mayor Linda T. Johnson noted, “*ISHPI*’s decision to locate their operations in Suffolk is evidence of how our City and region continues to attract prominent information technology firms. We maintain our commitment to the success and growth of all our technology companies and will work hard to support *ISHPI* as they grow within our City.”
