New Service Provider Makes Recycling Easier at Local Convenience Sites

SUFFOLK, VA (May 6, 2010) TFC Recycling, the same company offering a subscription-based curbside recycling program to Suffolk residents, is now servicing the existing convenience sites throughout the City. SPSA's old roll-off containers have been replaced with TFC's 8-cubic yard size containers. These new bins are designed to receive *mixed recyclable materials*, meaning residents can dump their items without separating them first.

At each convenience site TFC Recycling will collect and process *all* recyclable materials including:

- *All* types of office paper and other papers, including mixed paper (white and colored), white office paper, catalogues, magazines, newspapers, telephone books and unwanted mail.

- Cardboard – corrugated boxes, “old corrugated containers” (OCC)

- Paper board (examples: envelopes, file folders, single-layer cardboard used for copy paper and stationery boxes).

- Cans
 1. Aluminum cans, and semi-rigid aluminum packaging such as “pie plates”
 2. Steel cans, most commonly used for food products and beverages

- All plastic bottles (#1 and #2) – soda and water bottles, and juice, milk and water jugs and pint-size milk containers (“chugs”)

- Glass containers (bottles and jars) – brown, clear and green container glass
