Suffolk Public Works Announces Lane Closures

SUFFOLK, VIRGINIA (October 20, 2010) Suffolk Public Works wants you to know about two construction projects which could cause slight traffic delays. The first is taking place on Rt. 58, beginning at Lummis Road. The right lane is closed for 3 miles westbound for paving and line eradication. Once the westbound lane is finished, crews will switch to the right lane on the eastbound side. The work will take place week days between 7 am and 5 pm and is expected to be completed around November 1.

The second road project is also taking place on Rt. 58. The right eastbound lane of the highway at the weigh station is closed from 9 am until 3 pm. Crews expect work on the lane will be completed today.
