

BUILDER
RESIDENTIAL STATEMENT OF COMPLIANCE
FOR AIRSEALING
City of Suffolk, Virginia

Department of Planning and Community Development
Division of Community Development
757-514-4150

Permit #: _____ Site Address: _____

_____ Phone #: _____

Contractor/Owner Name: _____

I hereby attest that I will be using one of the following options of compliance for my Building Thermal Envelope Air Tightness Inspection as required by the 2012 VECC, Section R402.4.1.2:

A Blower Door Test will be performed per VECC, Section R402.4.1.2.1.

A Blower Door Test must be conducted and written results submitted by an approved qualified company. Written qualifications must be submitted to the Building Official for review and approval prior to conducting a blower door test.

I understand that **prior** to the installation of any exterior covering (i.e. siding) a Visual Inspection of the air barrier (house wrap) per VECC, Section R402.4.1.2.2 will be conducted by a City Inspector. Failure to obtain an approved Air Barrier Inspection will default to the permit holder providing Blower Door Test results complying with R402.4.1.2.

NOTE: No insulation is to be installed until all the trade Rough-In, Framing, and Air Barrier Inspections have passed. A separate insulation inspection will be required.

Signature of Applicant: _____ Date: _____

Printed Name of Applicant: _____
