Permit #: \_\_\_\_\_ Site Address: \_\_\_\_\_

\_\_\_\_\_ Phone #: \_\_\_\_\_

Contractor/Owner Name: \_\_\_\_\_

**I hereby attest that I will be using one of the following options of compliance for my HVAC Duct Sealing Inspection as required by the 2012 Virginia Energy Conservation Code (VECC), Section R403.2.2:**

- A Post-Construction or Rough-In duct tightness test (duct blaster) will be performed by an approved qualified individual, testing agency or contractor. Testing and results shall be as prescribed per VECC, Section R403.2.2.1 and approved recognized industry standards.
- I will request a Mechanical Duct Seal Inspection of the ductwork per VECC, Section R403.2.2.2 at which time a City Inspector will conduct a Visual Inspection of the sealing of joints and seams **prior** to being wrapped with insulation. Failure to obtain an approved Duct Seal Inspection will default to the permit holder providing Duct Blaster results complying with VECC R403.2.2.1

**NOTE:** Duct insulation will be inspected at the Mechanical Rough-In Inspection.
